

## Unit 6

### Lesson 1

### Session 12

# Man and Machine

Use defining, non-defining **relative clauses** to talk about **machines in lives**

# Lecture Time

**Man and Machine**

**Use defining, non-defining relative clauses to talk about **machines in lives****

**Controlling the weather**

**Use simple present perfect, continuous to talk about **climate**, extreme **weather**, recent events, changes**

**Unit 6  
In control?**

**Vocab  
Skill development**

**Understandd, use adj suffixes recognize linkers in conversation**

**Speaking - Writing**

**Wrote a professional email  
Change arrangements**

**Mist Catchers**

# In control? 1: Driving

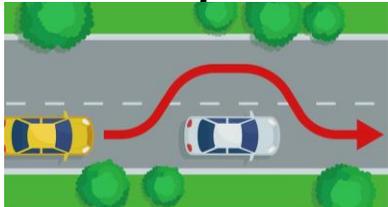

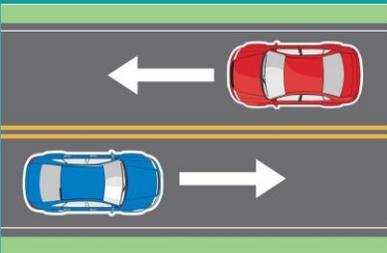

traffic

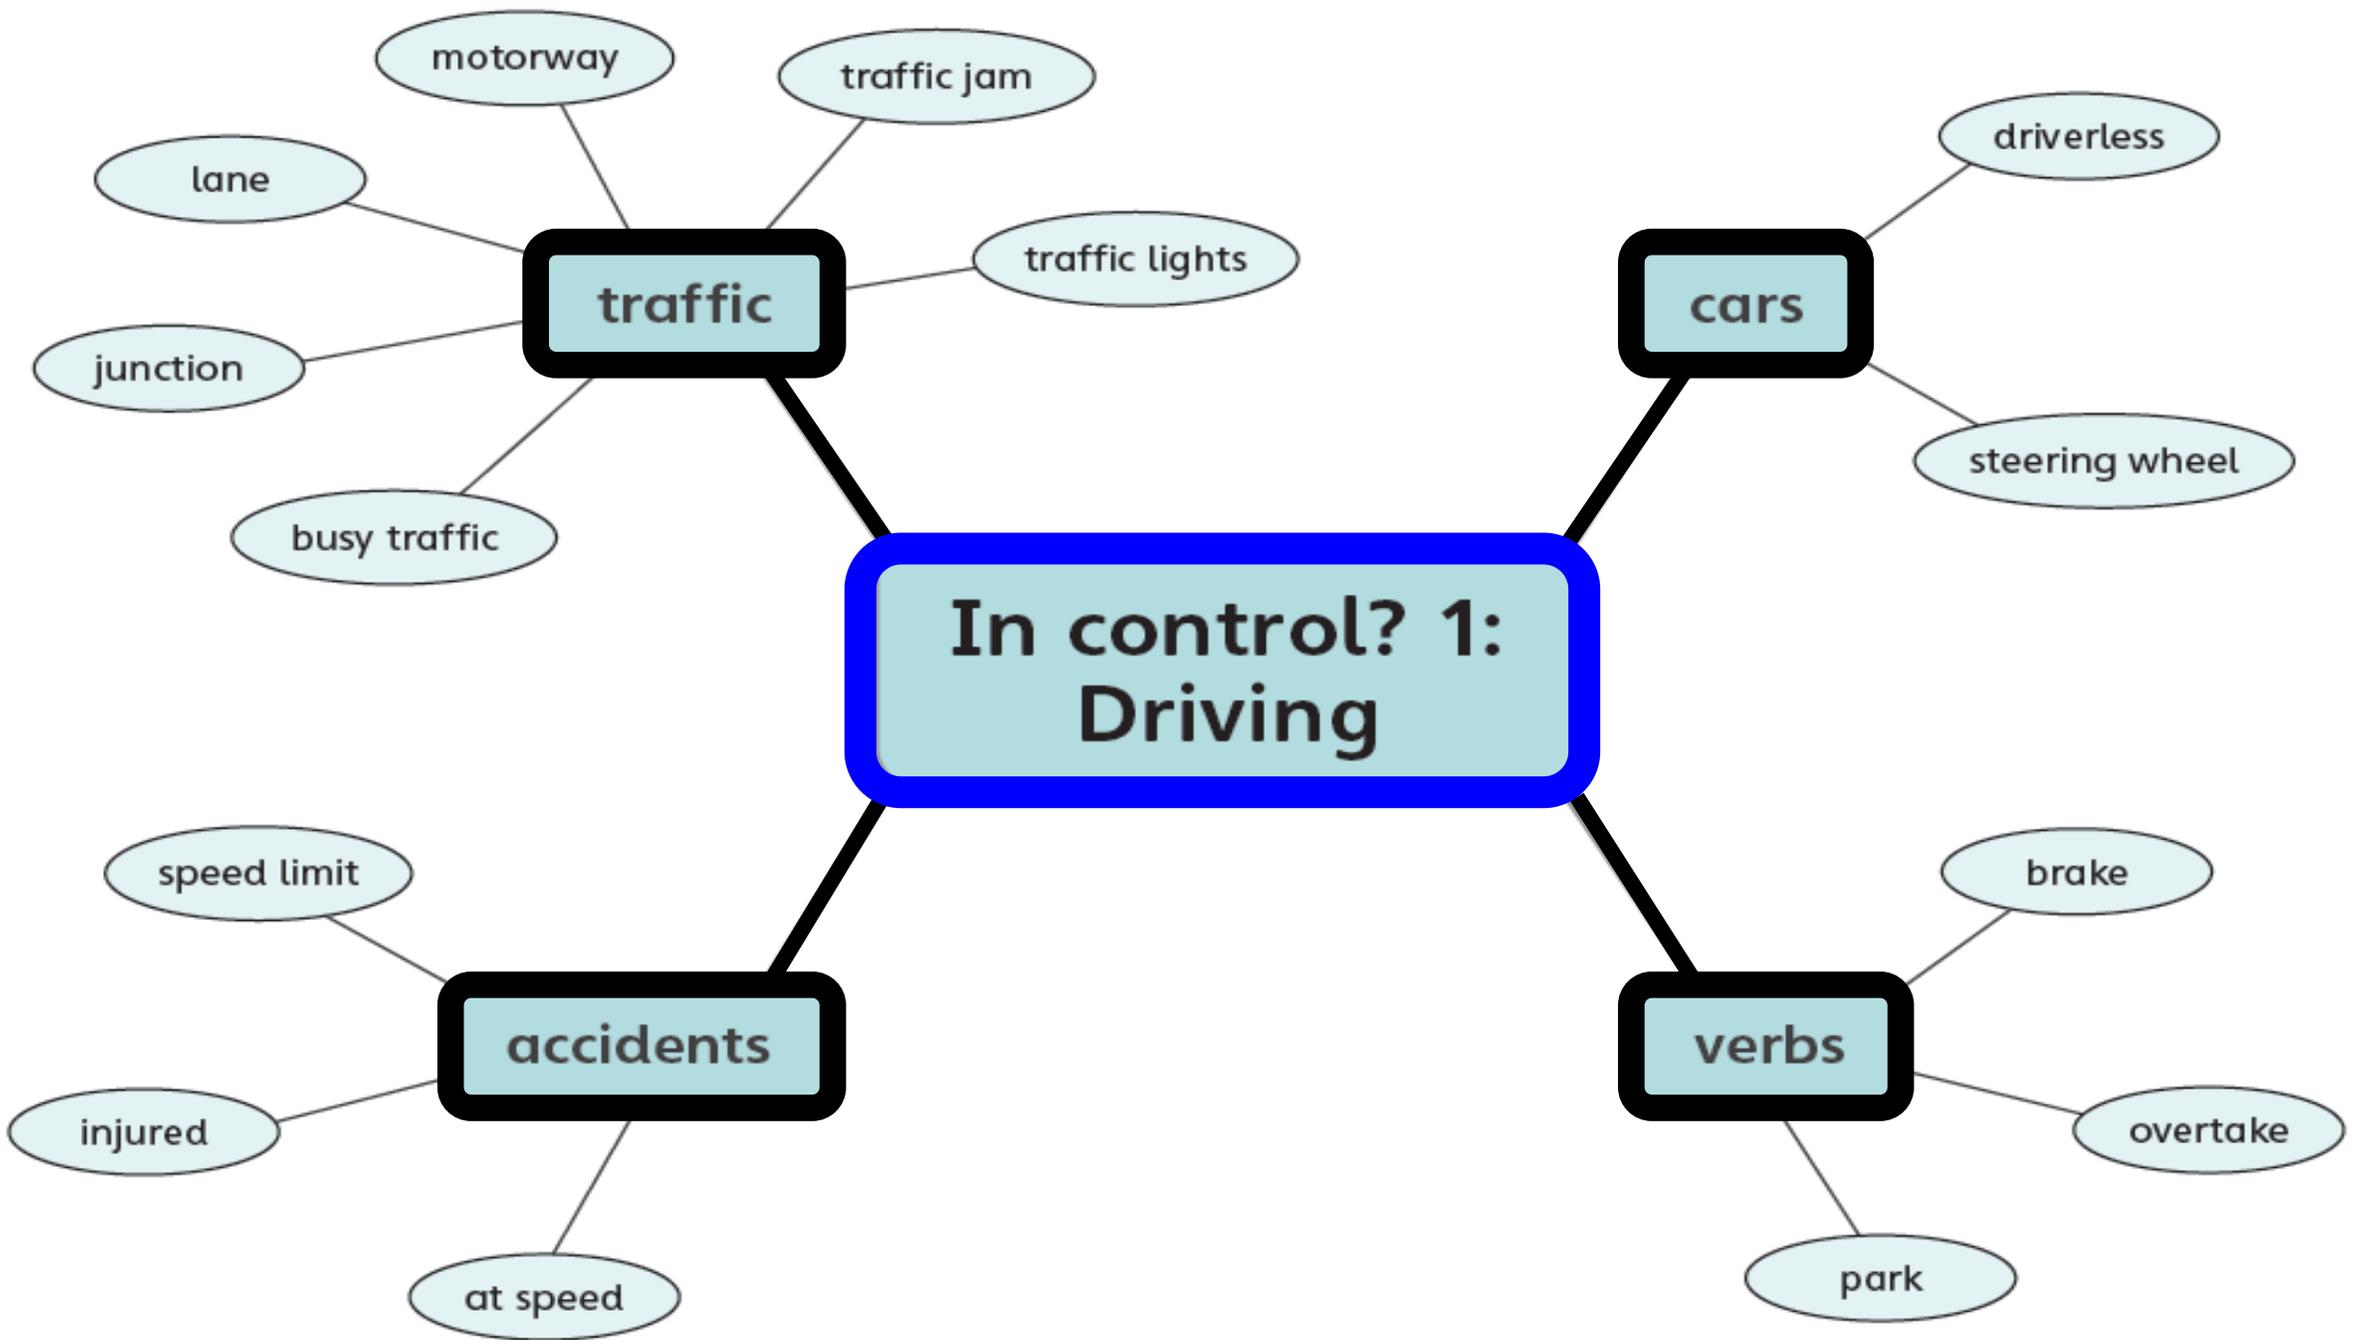

cars

accidents

verbs

# U6

**Do you prefer to be a **passenger** or the **driver** in a car ? why?**

## Complete paragraphs 1 – 2 with words in box

**brake** (v)

**park** (v)

**Busy**

**lane**

**traffic**

**driverless**

**motorway**

**steering wheel**

## Complete paragraphs 3 – 4 with words in box

**accidents - at speed**

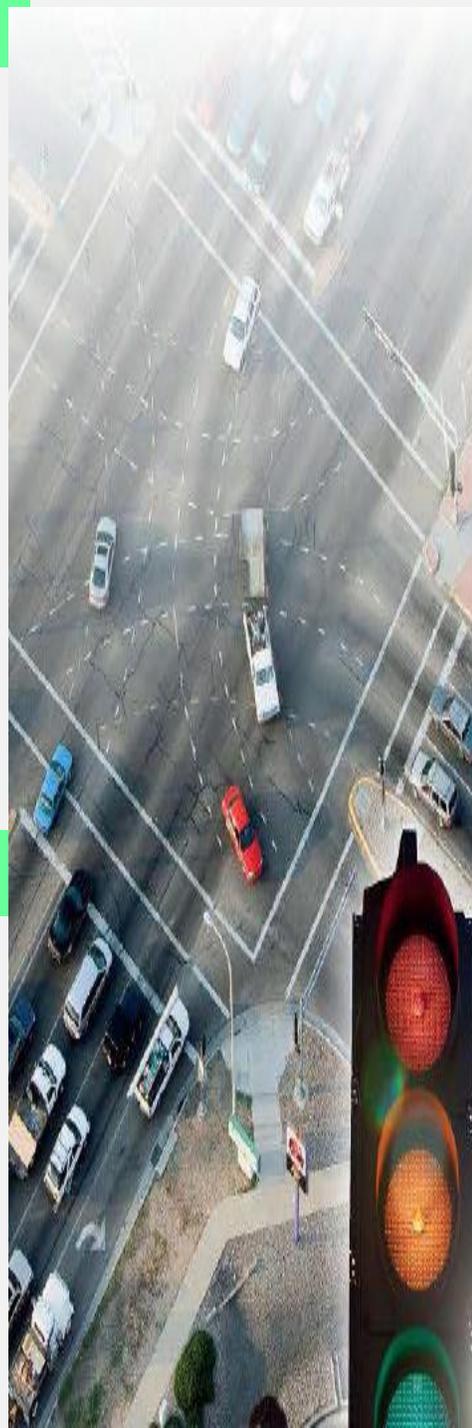

**junctions - overtake** (v)

**speed limit**

**injured**

**traffic lights**

**traffic jams**

Your car is now in charge:  
*'driverless* cars are already here.

6.1

- 1 Driving along the <sup>2</sup> \_\_\_\_\_ in <sup>3</sup> \_\_\_\_\_, the driver presses a button on the <sup>4</sup> \_\_\_\_\_. The car is now driving itself.
- 2 This may sound like science fiction, but driverless cars are already on the roads in California. Many cars can already <sup>5</sup> \_\_\_\_\_ themselves by the side of the road, <sup>6</sup> \_\_\_\_\_ automatically when the car needs to slow down, and warn the driver if they are slipping out of the correct <sup>7</sup> \_\_\_\_\_, so going driverless is just the next step.
- 3 Driverless cars come with fast broadband, allowing them to <sup>8</sup> \_\_\_\_\_ other cars safely, and even communicate with <sup>9</sup> \_\_\_\_\_ as they approach <sup>10</sup> \_\_\_\_\_. Being stuck in <sup>11</sup> \_\_\_\_\_ could become a thing of the past, as driverless cars will be able to drive <sup>12</sup> \_\_\_\_\_ much closer to each other.
- 4 More than fifty million people die or are <sup>13</sup> \_\_\_\_\_ in road <sup>14</sup> \_\_\_\_\_ every year, and 90% of these accidents are caused by human error. Google's driverless car sticks to the <sup>15</sup> \_\_\_\_\_ and doesn't get tired. So wouldn't it be much safer if all cars were driverless?

# Answer questions on advantages and disadvantages of driverless cars

1. Would driverless cars actually **reduce** busy traffic or traffic jams? **Why?**
2. Would they **reduce** the number of people injured in accidents? **Why?**
3. Who might particularly benefit from not having to hold a steering wheel or use the pedals?
4. Would you **trust** the car's computer with your life?

# Read comments a - c. Are they **for** or **against** driverless cars?

16  
MAY

Ecco254

a

I hate commuting to work – it's so stressful. <sup>1</sup> Having a car that drives itself would be wonderful for me, and <sup>2</sup> anyone else who has to drive a lot, but doesn't enjoy it. I must spend about 15 hours a week driving. <sup>3</sup> Think of all the extra time that I could use to check my emails or read a book.

16  
MAY

Dobs

b

*@Lucyloop* – People were worried about seat belts too at one time! <sup>4</sup> My cousin, who has actually been in one of these cars, said he felt perfectly safe, and so would I.

16  
MAY

Itsme22

c

Driverless cars would provide transport to people who can't drive themselves, such as blind people or those who are physically disabled. <sup>5</sup> My own physical disability, which I have had since birth, means that I will never be able to drive a 'real' car, so a driverless car could really change my life. <sup>6</sup> It would also be great for people whose eyesight has got worse with age, or who have simply lost confidence in their driving.

## Defining and non-defining Relative Clauses (RC)

1. **The book which I got for my birthday is great.**

defining RC

2. **Agatha Christie, whose books are very popular, was a famous author.**

non-defining RC

There are 2 types of relative clause: **defining** and **non-defining**.

With both types, relative clause helps us **understand more** about person, thing that we are talking about by **giving us more info**.

**The country where I grew up is not very far away.**

Relative clauses come **after** person, thing we have mentioned, and they start with a relative pronoun (**who, which, that, whose**) or a relative adverb (**where, when**).

1. That's the teacher **who** taught me last year.

Which teacher?

2. Is this the book **which/that** you borrowed from me?

Which book?

3. He's the student **whose** phone I used.

Which student?

use defining clauses to **identify exactly** who, what we are talking about

**The book ~~which~~ I read last week was amazing!**

Delete relative pronoun if it refers to **object** of verb.

**Many disabled people, who have never been able to drive until now, can benefit greatly from these new cars.**

**Modern phones, which are becoming cheaper, can do almost as much as computers nowadays.**

**My cousin, whose job takes him all over the world, can now communicate with his family cheaply and easily via his computer.**

**Non-defining relative clauses do NOT tell us exactly *what* or *who* we are talking about because it is usually clear or we already know. Non-defining relative clauses normally give us extra info about what or who we have already mentioned.**

**do NOT use *that* in non-defining relative clauses, only *who*, *which* or *whose*.**

**It was built in a developing country, *which* benefits greatly from exports.**

**use commas in non-defining relative clauses.  
put them around extra info, or before relative clause if this comes at end of sentence.**

**The university **where** I did my degree was in the north of England.**

**At university, **where** many of us make lifelong friends, we meet people from all kinds of backgrounds.**

**It's in winter **when** most car accidents happen.**

**After dark, when drivers are in a hurry to get home, pedestrians need to wear light colours or carry a torch.**

**use relative adverbs **where** and **when** in defining and non-defining relative clauses.**

## **Rewrite the 2 sentences as one sentence using a **relative clause**.**

- 1. I've bought him a book for his birthday. I think he'll like it.**
- 2. She didn't like the film. I recommended it to her.**
- 3. Where was the place? You went to it on holiday last year.**
- 4. The dry season is a time of year. Most people visit Malaysia then.**
- 5. The painting is an original by Picasso. Picasso's signature is missing.**
- 6. Was he the inventor? He created the driverless car.**

# Complete extract from a newspaper with correct **relative pronouns**.

6.2

Sometimes no **relative pronoun** is necessary

NEWS

Technology

**Amazon drone**

Intelligent machines <sup>1</sup> \_\_\_\_\_ can serve us in supermarkets, give us directions and even drive for us as we are becoming part of all our lives. Some of the things <sup>2</sup> \_\_\_\_\_ machines can do now would have seemed impossible just a few years ago. And there's more to come. Amazon promises robot drones <sup>3</sup> \_\_\_\_\_ will deliver our packages, and Rolls-Royce says robo-ships, <sup>4</sup> \_\_\_\_\_ won't need any crew, will soon be sailing our seas.

But what will this mean for our workers? Some think that only people <sup>5</sup> \_\_\_\_\_ skills are better than the machines' abilities will have work. Those <sup>6</sup> \_\_\_\_\_ don't have high-level skills risk being unemployable, or will have to work for very low wages.

7a **TASK** Work with a partner. Make two lists, one of arguments for and one of arguments against intelligent machines.

b Work with another pair. One pair should argue in favour of intelligent machines, the other should argue against. Which arguments are most convincing?

Decide which examples in the article are defining relative clauses and which are non-defining.

Compare answers with a partner.

## Man and Machine

Use defining, non-defining  
relative clauses to talk  
about **machines in lives**
